1. Economic Roundup

A summary of some key announcements since the last update together with a round-up of recently published research and insights from a range of organisations.

[Announcements/ Press Releases/ News Stories](#)

[Area Skills Advisory Panel \(SAP\) autumn update](#) - Please see a summary update on some of the current skills work that the SAP is supporting in the Leicester and Leicestershire area – 15/10/2022.

[Research](#)

[Leicester and Leicestershire Internationalisation Report](#) – Provides information on international trade, a key area for economic growth identified in the Leicester and

Leicestershire Local Enterprise Partnership delivery plan. Internationalisation is seen as an important way to increase goods and services flow, which can have a positive effect on the economy. The report shows how internationalisation can help to drive growth, create jobs and boost productivity – 15/10/2022.

[Alternative Claimant Count statistics January 2013 to August 2022](#) - Official experimental statistics on the number of people claiming unemployment related benefits and estimates of the proportion in-work – 11/10/2022.

[Employees in the UK: Revised 2020 and provisional 2021 estimates](#) - Business Register and Employment Survey (BRES) publishes employee and employment estimates at detailed geographical and industrial levels and is regarded as the definitive source of official government employee statistics - 13/10/2022.

[Rising business insolvencies amid high energy prices](#) - Persistently high energy prices are becoming a growing concern for businesses across the UK. Several businesses are finding it increasingly difficult to sustain operations in a high energy-price environment - 07/10/2022.

[Business insights and impact on the UK economy](#) - The impact of challenges facing the economy and other events on UK businesses. Based on responses from the voluntary fortnightly business survey (BICS) to deliver real-time information to help assess issues impacting UK business – 06/10/2022.

[Business population estimates 2022](#) - Annual business population estimates for the UK and regions in 2022 – 06/10/2022.

[UK Labour Market: October 2022](#) - Estimates of employment, unemployment, inactivity, average weekly earnings, vacancies and other labour market related statistics for the UK – 11/10/2022.

2. Claimant Count

In September 2022 the claimant rate in the Leicester and Leicestershire area was 3.1%. This translates to 20,740 claimants. In August the figure was 3.1% (20,670). At a national level the claimant rate in England was 3.8%. This is 0.7 of a percentage point higher than the local figure.

The claimant rate for the Leicester and Leicestershire area could be described as static, as it has remained at 3.1% since June.

The picture is very different in the city and county with Leicester having a claimant rate of 4.8% and Leicestershire 2.1%. This is a difference of 2.7 percentage points. Leicester's claimant rate is 1 percentage point higher than the England average (3.8%).

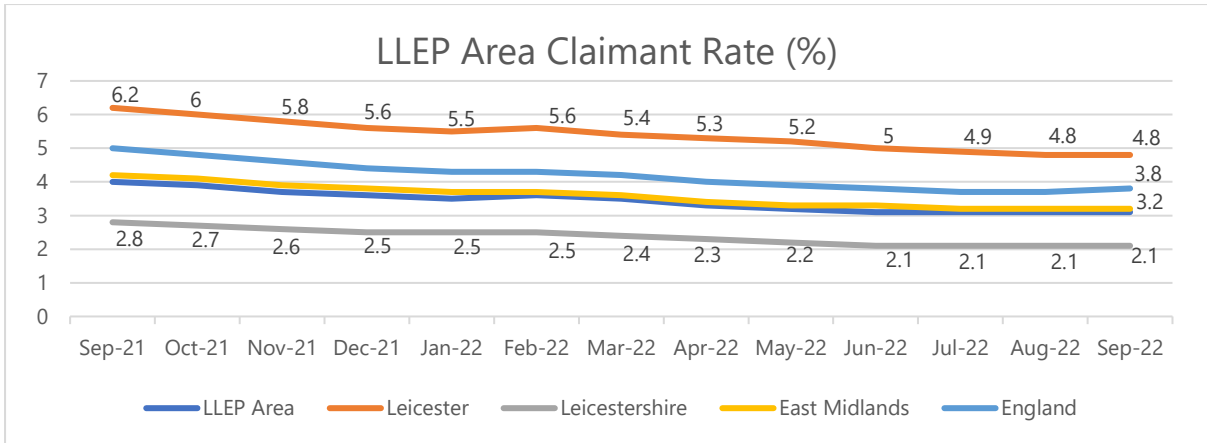

Figure 1: LLEP Area Claimant Rate (%) September 2021 – September 2022
Source: ONS

Figure 2 below provides a timeseries for the Leicester and Leicestershire area and compares this with regional and national figures.

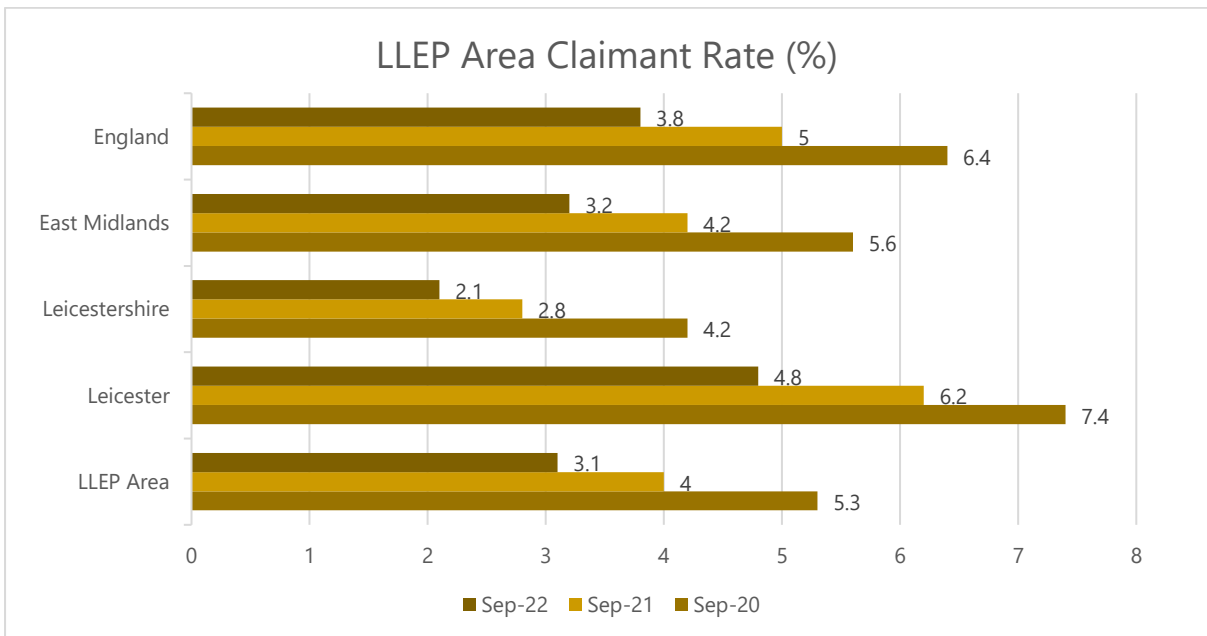

Figure 2: LLEP Area Claimant Rate (%) September 2020 - September 2022
Source: ONS

Of the 20,740 claimants over half (54.6% or 11,325) were based in Leicester and 9,415 or 45.4% in Leicestershire.

In March 2020 the claimant rate was 2.3% (or 15,145). Between March 2020 and the end of September 2022 the claimant rate increased by 0.8 of a percentage point to 3.1% (20,740). This translates to an additional 5,595 claimants or a percentage increase of 36.9%.

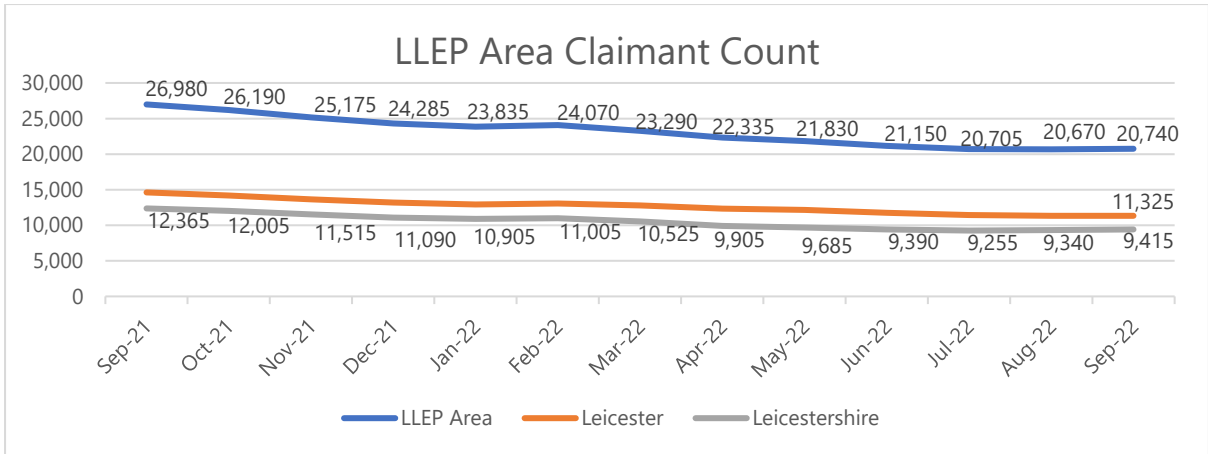

Figure 3: LLEP Area Claimant Count September 2021 – September 2022
Source: ONS

In the Leicester and Leicestershire area over the period March to August 2020 the number of claimants grew from 15,145 to 36,025 (it's peak locally). This was a rise of 20,880 claimants or 138%. When comparing the figures for August 2020 and September 2022 against those for March 2020 the difference has fallen from 20,880 to 5,595. Since September 2021 the number of claimants has fallen by 6,280 (from 26,980).

Figure 11 later in the report, demonstrates the claimant rate over the period January 2021 to September 2022, and the number of unique job postings (for the same period).

Figures 4 and 5 below project claimant numbers forward to the end of September 2023. Projections are based on the last 3, 5 and 8 months and an average of these. These help to identify the direction of travel in relation to claimant numbers. The average figure for September 2023 is 17,443 or 2.6%. This is above the pre-pandemic level of 2.3%. When comparing this month against other recent projections it is shown that projections are growing.

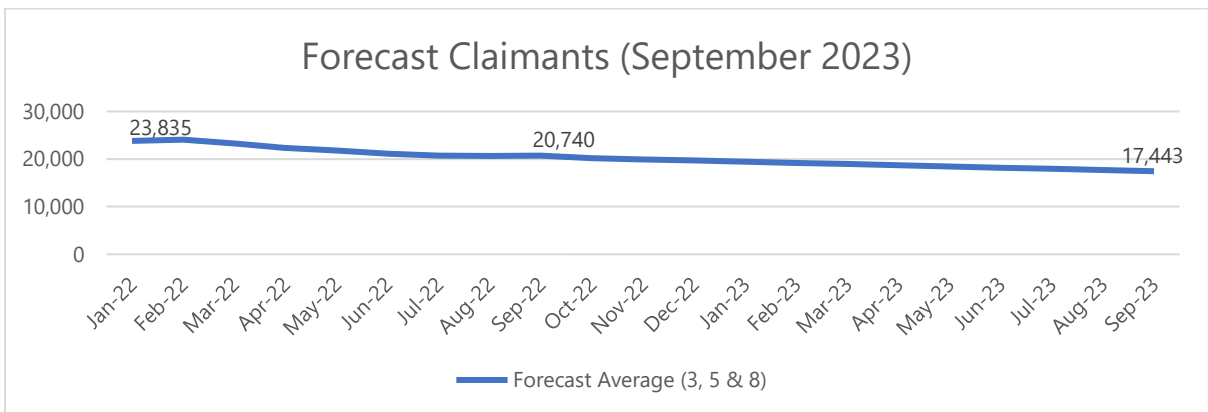

Figure 4: LLEP Area Claimant Forecast Average to September 2023.
Source Data: ONS

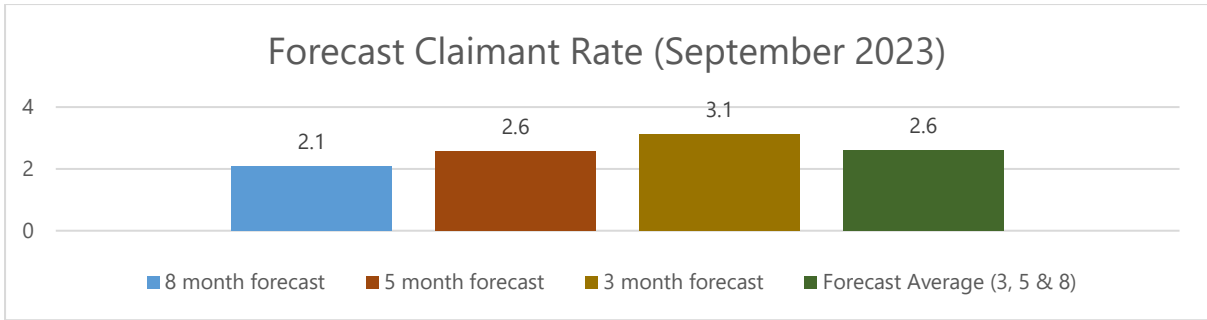

Figure 5: LLEP Area Claimant Rate Forecast, 3, 5, 8 and Forecast Average, September 2023.
Source Data: ONS

Note: It must be noted that these forecasts are linear, claimant numbers however are governed by a variety of events both foreseen and unforeseen, as such forecast data should be treated with caution.

In relation to age, figures for September 2022 demonstrate that there were on average a larger share of 25-49 years olds (3.5%) who were claimants than 18-24 years olds (3.3%) and claimants that were 50 and over (2.5%). Claimant rates in England were higher for 18-24 years olds (4.6%), 25-49 years olds (4.3%) and those who are 50 and over (2.9%).

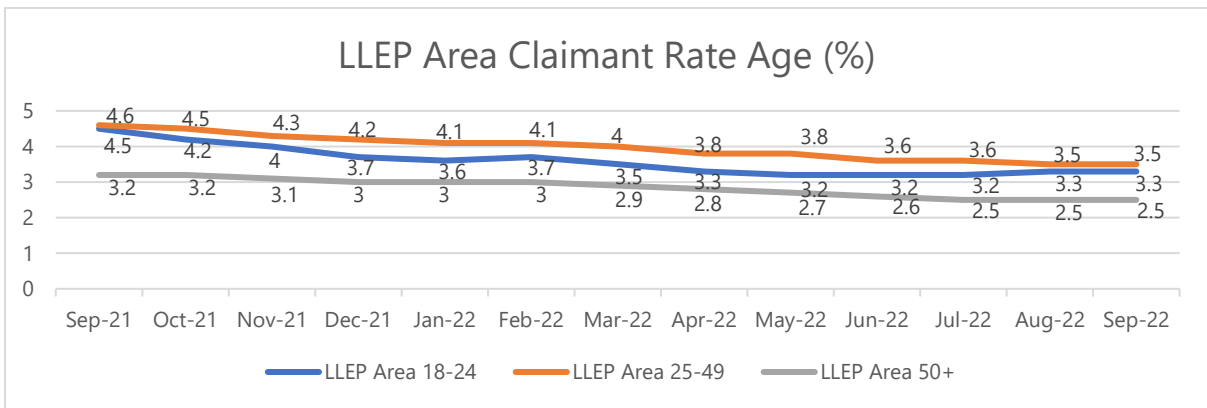

Figure 6: LLEP Area Claimant Rate by Age (%) September 2021– September 2022
Source: ONS

Figure 7 below demonstrates the claimant rate for 18-24 years olds for the Leicester and Leicestershire area and its component parts.

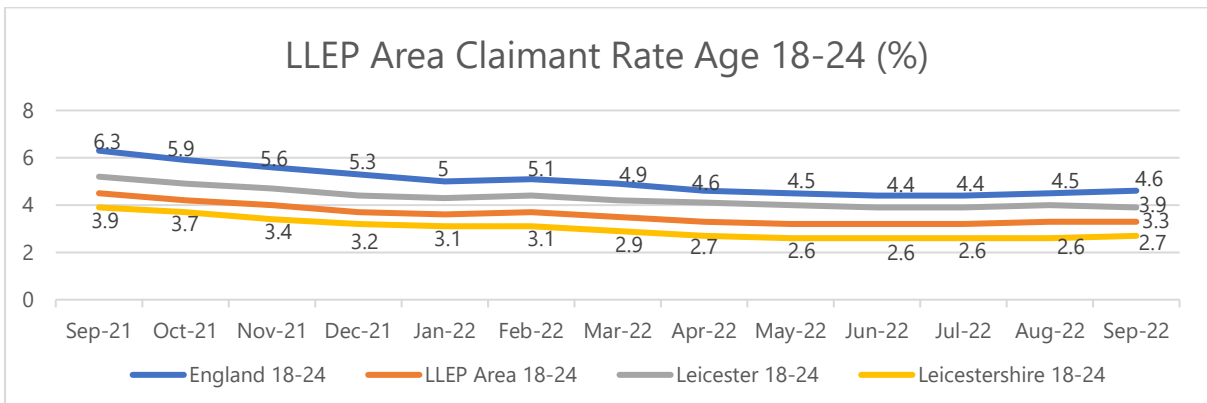

Figure 7: LLEP Area Claimant Rate by Claimants Aged 18-24 (%) September 2021 – September 2022
Source: ONS

Eleven thousand five hundred and fifteen (55.5%) claimants were male and 9,225 (44.5%) were female.

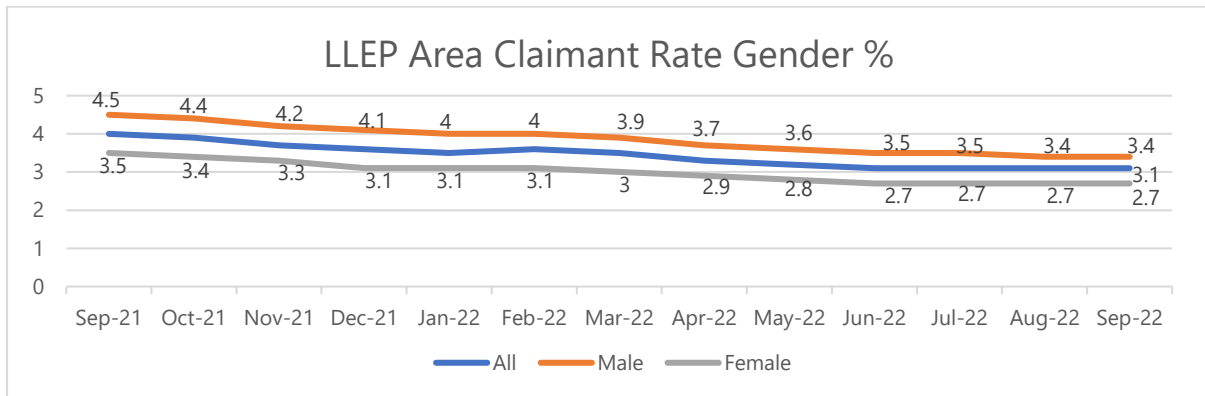

Figure 8: LLEP Area Claimant Rate by Gender (%) September 2021 – September 2022
Source: ONS

The figure below demonstrates the number of claimants in the Leicester and Leicestershire area over the period September 2014 to September 2022.

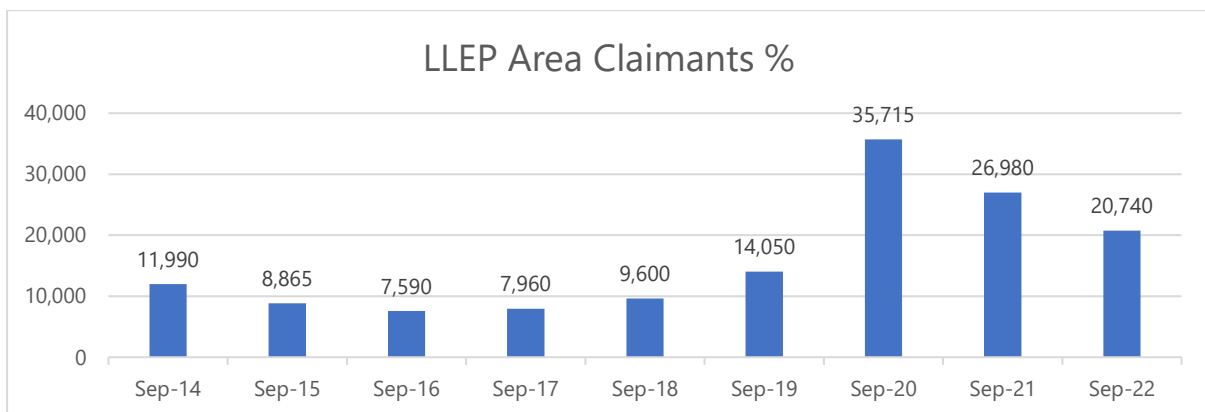

Figure 9: LLEP Area Claimant Count September 2014 - September 2022
Source: ONS

Note: It must be noted that figures will be revised by the Office for National Statistics.

3. Universal Credit Claimants

Universal Credit claimants are placed in a conditionality group based on their circumstances and work capability and this determines what is expected of them during their claim.

In the Leicester and Leicestershire area most claimants are either in the working conditionality group or the searching/planning/preparing for work group. However there continues to be growth in those with no work requirements.

When compared to March 2020 all three groups have seen significant growth in numbers.

Over the last month (August to September) the numbers searching, planning, or preparing for work has grown to 25,689 (from 25,558). The numbers who are working has also risen (35,503 to 36,313).

From September 2021 those searching, planning, or preparing for work has fallen by 5,666. Over the same period those with no work requirements grew by 5,666 (19,000 to 24,666). Since March 2020 there has been a steady but significant rise in the number of people who are not seeking work/ have no work requirements with numbers more than doubling during the period. In March 2020, the figure was 10,997 and in September 2022 it was 24,666 (a rise of 13,669). Over the last year those not seeking work/ have no work requirements has grown by 6.4 percentage points.

Source: DWP via Stat-Xplore

For more data on Job Seekers Allowance and the Universal Credit claimant count by district, visit the [Unemployment Dashboard](#) on the LSR Portal.

4. Relationships

The figure below demonstrates the relationship between the claimant count, unique job postings and the Furlough scheme and its closure. Data is for the period 2021 and 2022 in the Leicester and Leicestershire area.

The numbers of unique postings have had a positive impact on the numbers of claimants. In September however there was a fall in the number of unique job postings and a small rise in the number of claimants. The claimant rate in the Leicestershire area has remained at 3.1% for the last 4 months. This may reflect the cost-of-living crisis, energy and other price rises and increases in inflation that translate to larger operating costs and further pressure on business and consumers.

It is likely that things will be further complicated by the impact of and reaction to the measures brought in on the 22/09/2022 by the government through its mini budget and the reversal of these same measures with the appointment of a new Chancellor of the Exchequer.

Note: It must be noted that figures are subject to change and there are likely to be adjustments to those areas identified.

Claimant Count & Unique Job Postings 2020, 2021 & 2022

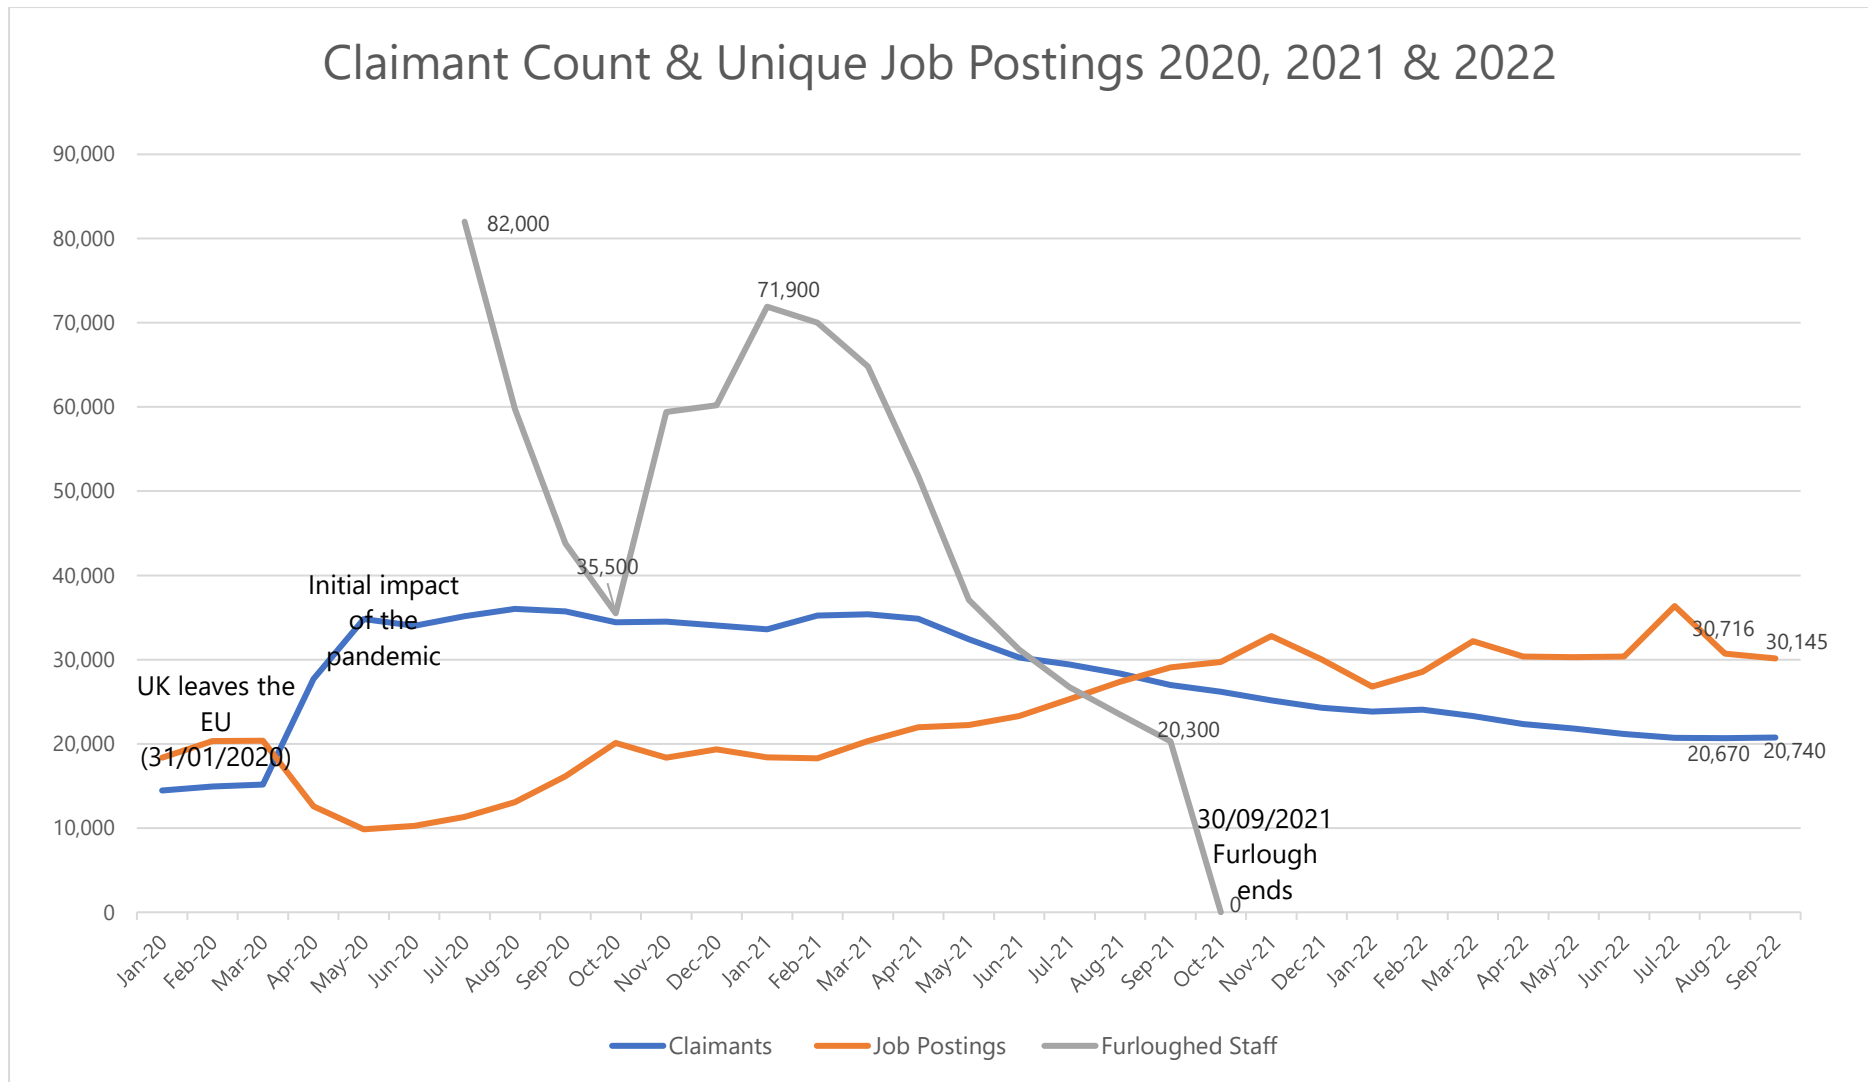

Figure 11: Monthly Claimant Count, Unique Job Postings and Total Number of Eligible Staff Furloughed January 2020 Onwards
 Source: ONS Claimant Count, Lightcast Unique Job Postings and HMRC Job Retention Scheme

5. Job Postings

Unique job posting data is drawn from a range of sources and provides timely data on how the trend in the number of live job adverts is changing in the Leicester and Leicestershire area by occupation and geography.

However, the number of job adverts being posted is not a direct measure of labour force demand. Job adverts may not be removed from online job vacancy boards immediately once a position is filled, so the data may not fully reflect companies who have halted active recruitment.

The data is compiled from multiple job vacancy boards and adverts may still be considered “live” if the posting is still live on any board, even when it has already been removed from an alternative source (Lightcast remove jobs from their Analyst platform after 61 days).

The scope of online job adverts does not fully capture the region’s economic activity because of differing advertising methods, for example, casual work may be advertised by word-of-mouth.

Table 1 demonstrates unique job postings by occupation for September 2022. These are compared with March 2020, September 2021 and August 2022. Standard Occupation Codes are at a two-digit level.

The number of unique job postings for September 2022 is higher than September 2021 by 1,074 (30,145 compared to 29,071). This is a rise of 3.7%.

Over the last month the number of job postings fell from 30,716 to 30,145. This is a fall of 571 or 1.9%.

In terms of numbers, over the last year there have been rises in job postings in all but 6 of the occupation areas.

In the last 12 months the occupation areas that saw the largest growth in job postings numbers were:

- Administrative Occupations
- Customer Service Occupations
- Elementary Administrative and Service Occupations

In the last month there have been falls in job postings in all but nine of the occupation areas.

As a means of further understanding how the local jobs market is changing, Table 2 demonstrates the year-to-date unique job postings figures for 2019, 2020, 2021 and 2022 and compares these.

Across the job market the number of unique job postings (YTD) has increased from 48,528 in 2019 to 101,774 in 2022. This is growth of 53,246 or 109.7%. All occupations areas have seen growth.

6. Business Closures and Incorporations

In September 2022 the number of businesses that ceased trading was 763. The figure for September 2019 was 556, 2020 880 and 2021 1,112.

In August 2022 there were 984 businesses that ceased trading. This is a monthly fall of 221 business failures.

Figure 14 demonstrates the cumulative growth in business failures for the years 2019, 2020, 2021 and 2022.

In 2022 (to the end of September) there were 9,055 failures. For the same period in 2019 the figure was 6,718, in 2020 3,275 and 2021 8,589.

Table 4 demonstrates those sectors where there have been 15 or more business closures and 15 or more incorporations for the year to date (2022). Table 4 also helps provide an understanding of the impact of the pandemic on business and how different sectors are reacting to it. It shows how different parts of the local business community are expanding and contracting and where business is bouncing back as the economy reopens.

Activity (prim. UK SIC 2007)	Dissolved	%	Incorporated	%
Wholesale trade, except of motor vehicles and motorcycles	2,031	22.4	379	4.8
