UK Business Counts 2023,
Leicester and Leicestershire
- Leicestershire

Released at the 27/09/2023 the Office for National Statistics UK Business Counts contains two datasets, one containing counts based on the number of enterprises and the other on local units. This report uses the number of enterprises.

An enterprise can be thought of as the overall business, made up of individual sites or workplaces. A local unit is an individual site associated with an enterprise. As may be expected there are more local units than enterprises.

Data contained in the report covers the period 2015 to 2023 and is at a two digit level (Standard Industrial Code).

UK Business Counts are estimates that are available at a range of geographies. The geographies used in this and accompanying reports are at the LLEP, local and district authority areas. Comparator data is made available at a national level (England).

Note: Figures used in this report have been subject to rounding.

Benchmark Industry Share Leicestershire and England Areas 2023

The clustered bar chart below shows the estimated share of industries in the Leicestershire area and compares these with the English average.

Industry Business Location Quotients Leicester and Leicestershire Area 2023

Industry Business Location Quotients Leicestershire Area 2023

The clustered bar chart demonstrates location quotients based on industry share locally compared to the share nationally. Location quotients that are 1.5 and above are considered to be area specialities. Local specialities can be a good or bad thing depending on the industry. High location quotients do not guarantee high business or employment numbers. Those industries shown have 30 or more businesses.

Note: It must be noted that business location quotients are different to employment location quotients and these may produce a different set of results. Business and employment location quotients should be used together where possible to present a clearer picture of the business community.

Note: Location quotients can be found by dividing the local share of business or employment for an industry by the average share (in this case England).
